Citing your Sources

How to make a
Reference List

What makes a good source?

A good source is CRAAP

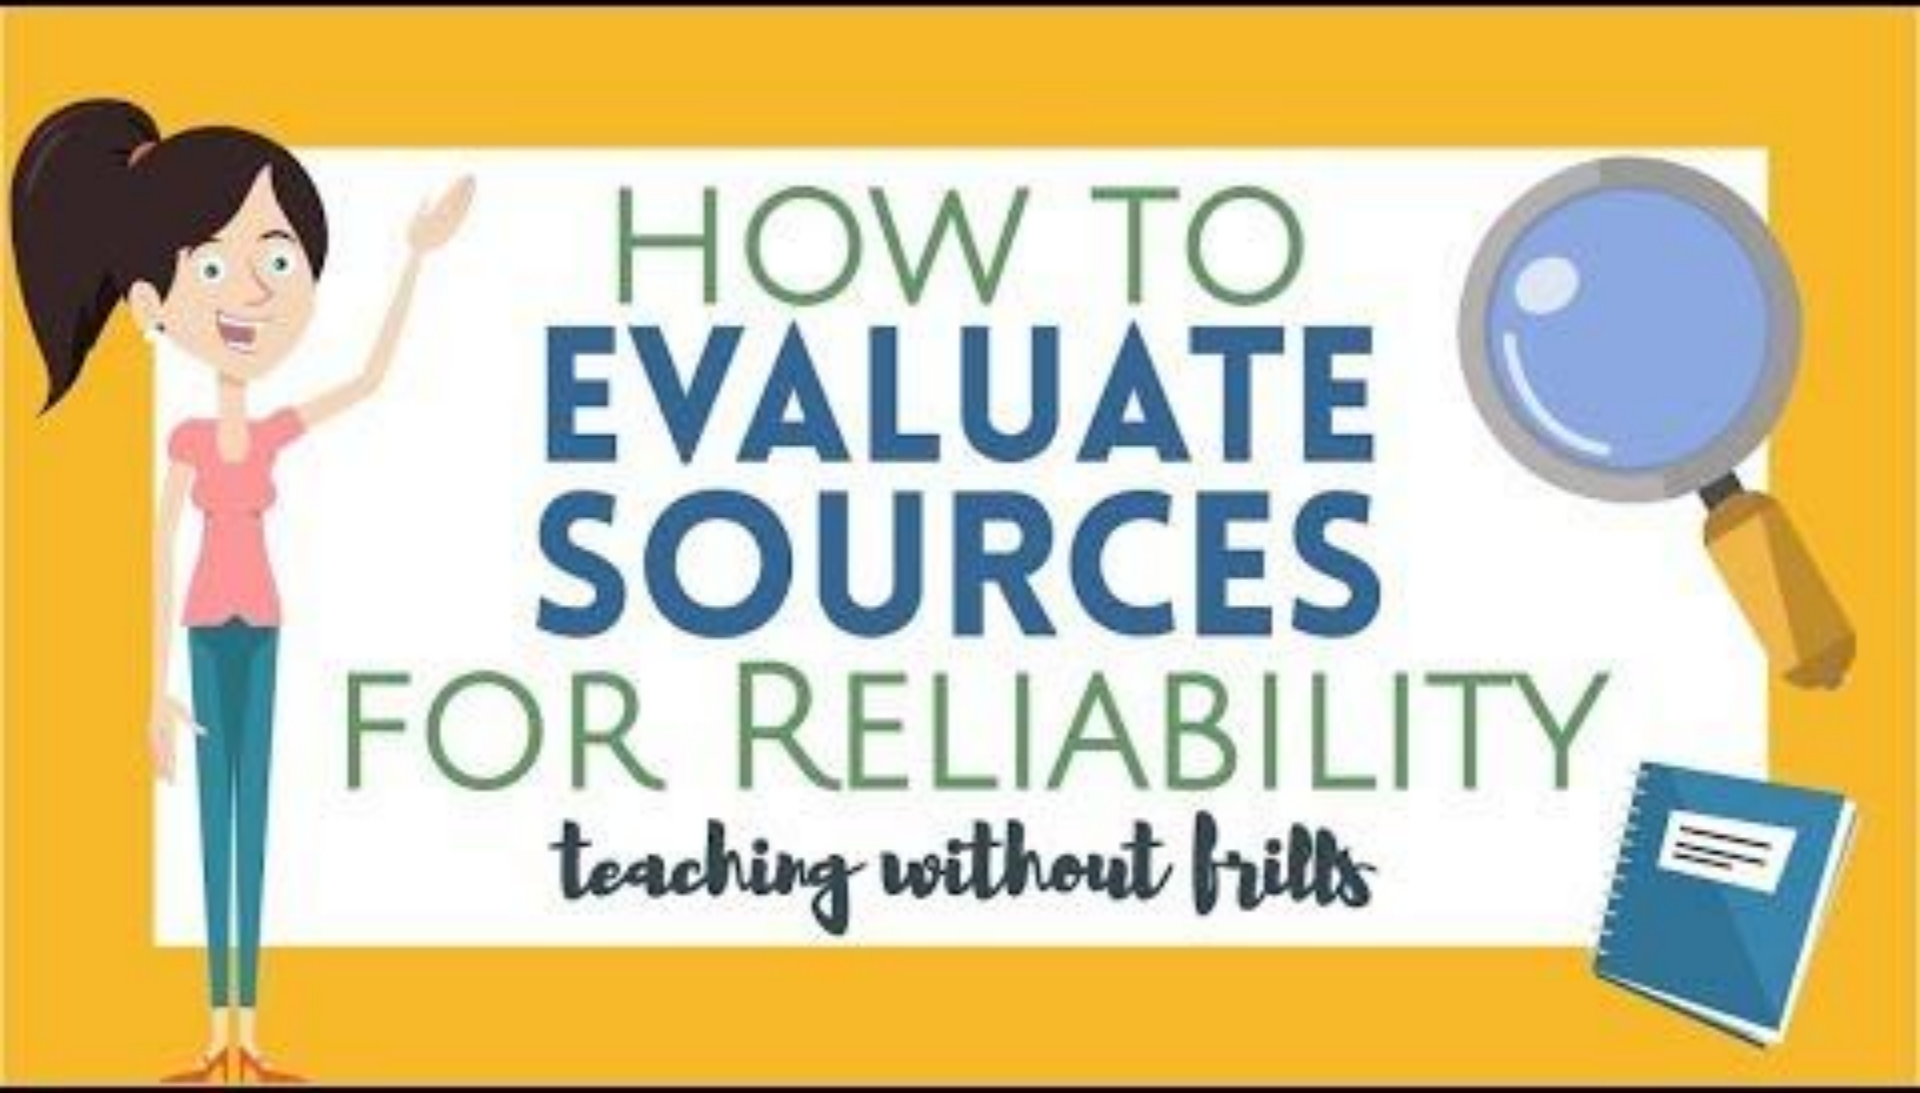
C urrency (timeliness)

R elevance (importance)

A uthor (source)

A ccuracy (truthfulness)

P urpose (reason)



HOW TO
EVALUATE
SOURCES
FOR RELIABILITY
teaching without frills

Why do we have to cite our sources?

- To show where you got your **information** from.
- To give **credit** to the person who wrote the information.
- So the **reader** can find more info if they want to know more!

How is a Reference list organized?

- It goes at the **end** of your work.
- The title at the top is **References** . It is **centered** and **bolded** .
- The sources you use are listed in **alphabetical** order by author's <u>last name</u>
  - An "author" could be a **person** (ex: Zhang, E.) OR an **organization** (ex: Health Canada)

What does a source need for the Reference List?

- A source has to have a few pieces of important information:
  - Author's **name**
  - Publication **date**
  - **Title**
  - **Where it's from** (ex: book, website URL, etc.)

Author. (Year, Month Date). *Title of page.* Site Name. https://www.website.com

Jet Propulsion Lab. (1999, June 12). *Planet Mercury.* NASA https://www.jpl.nasa.gov/images/planet-mercury

Special scenarios to note

- Site name is <u>only</u> needed if it's **different** from the group name.
- If there is no date use **(n.d.)**
- Don't use the **copyright** date
- Use **line spaces** to distinguish between sources

Remember!

- Include ALL of the information required
  - Use (n.d.) if there is no date

- Your list of references is put into alphabetical order by the author's name

- Align your doc to the <u>LEFT</u> (don't center it!)

- Come back to this lesson when you need help - it's posted on our Google Classroom!
